# VOLUME CONTENTS

*Vol. 139 No. 1 1992*

A. KEITH PIERCE / The Observed Limb Effect in Fraunhofer Lines, II 1

CHRISTOPHER S. CARTER, HERSCHEL B. SNODGRASS, and CLAIA BRYJA / Telluric Water Vapor Contamination of the Mount Wilson Solar Doppler Measurements 13

C. S. ROSENTHAL / Absorption of Acoustic Waves by Sunspots, II 25

FRANCA CHIUDERI DRAGO, ODDBJØRN ENGVOLD, and EBERHART JENSEN / The Prominence–Corona Transition Region in Transverse Magnetic Fields 47

JUN KUBOTA, REIZABURO KITAI, ICHIRO TOHMURA, and AKIRA UESUGI / The Sudden Disappearance of a Dark Filament Observed on October 26, 1989 65

P. HEINZEL, B. SCHMIEDER, and P. MEIN / Structure and Dynamics of Cool Flare Loops 81

P. DÉMOULIN, J. C. HÉNOUX, and C. H. MANDRINI / Development of a Topological Model for Solar Flares 105

A. I. PODGORNY and I. M. PODGORNY / A Solar Flare Model Including the Formation and Destruction of the Current Sheet in the Corona 125

P. A. ROBINSON / Clumpy Langmuir Waves in Type III Radio Sources 147

E. KIRSCH, P. C. TROCHOUTSOS, E. T. SARRIS, and S. McKENNA-LAWLOR / Observation of Shock-Accelerated Protons by GIOTTO and IMP-8 under Solar Minimum Conditions in February 1986 165

M. AKIOKA, J. KUBOTA, M. SUZUKI, and I. TOHMURA / Detailed Comparison between Sunspot Activity in 'Hot Spots' and Galactic Cosmic-Ray Intensity 177

J. F. VALDES-GALACIA, J. J. QUENBY, and X. MOUSSAS / Cosmic-Ray Perpendicular Diffusion Coefficient Computed Using Voyage Data at 15 AU 189

SOLAR PHYSICS LETTERS:

V. I. ZHUKOV / Solar P-Modes Oscillations and Heating of the Corona 201

Z. B. KOROBOVA / The White-Light Solar Flare of March 27, 1991 205

Erratum 209

*Vol. 139 No. 2 1992*

VOLUME CONTENTS

HARRISON P. JONES, THOMAS L. DUVALL, JR., JOHN W. HARVEY, CHARLES T. MAHAFFEY, JAN D. SCHWITTERS, and JORGE E. SIMMONS / The NASA/NSO Spectromagnetograph 211

YU. A. SOLONSKY and V. V. MAKAROVA / The Peculiarities of Rotation of the Solar Polar Regions 233

T. BARANYI and A. LUDMÁNY / Study of Possible Subsurface Influences on the Emerging Active Regions 247

M. R. McPHERSON, H. LIN, and J. R. KUHN / Infrared Array Measurements of Sunspot Magnetic Fields 255

JEONGWOO W. LEE / Observational Evidence for Various Models of Moving Magnetic Features 267

L. N. KUROCHKA, I. P. KRYACHKO, and E. MARKOVA / On the Recording of Regions with Increased Plasma Density on the Sun 275

K. MURAWSKI / Alfvén-Magnetosonic Waves Interaction in the Solar Corona 279

N. M. BAKHAREVA, V. V. ZAITSEV, and M. L. KHODACHENKO / Dynamic Regimes of Prominence Evolution 299

P. XU and T. G. FORBES / The Structure of Radiative Slow-Mode Shocks 315

V. V. ZAITSEV and A. V. STEPANOV / Towards the Circuit Theory of Solar Flares 343

T. S. BASTIAN and D. E. GARY / Radio Observations of the M8.1 Solar Flare of 23 June, 1988: Evidence for Energy Transport by Thermal Processes 357

JU. E. CHARIKOV and G. D. FLEISHMAN / On the Saturation of Electron-Cyclotron Masers in Solar Flares 387

SOLAR PHYSICS LETTERS:

V. S. TITOV / On the Method of Calculating Two-Dimensional Potential Magnetic Fields with Current Sheets 401

ZDENĚK ŠVESTKA, KERMIT L. SMITH, and KEITH T. STRONG / X-Ray Observations of Limb Flare Loops and Post-Flare Coronal Arch 405

Book Reviews:

P. Ulmschneider, E. R. Priest, and R. Rosner (eds.), *Mechanisms of Chromospheric and Coronal Heating* (J. M. FONTENLA) 409

I. Tuominen, D. Moss, and G. Rudiger (eds.), *The Sun and Cool Stars: Activity, Magnetism, Dynamos* (D. J. MULLAN) 409
